

History of Photography

Women In Photography

Points for Consideration

- 1) What special problems did 19th Century women who wanted to be photographers encounter?
- 2) How have those problems changed in the latter half of the 20th Century?
- 3) Are important women photographers remembered because of gender, images or both?
- 4) Can it be said that women have historically photographed a particular type of subject matter? Why or why not?

Terms and Names
